

1. All AMA (Academy of Model Aeronautics) Rules apply to 107th Club at all times.
2. All flyers, including guests, must be AMA Members. Buddy Box learners need not be but Pilot-in-Command must be.
3. All cars must be parked at east side facing route 107.
4. Only radio-controlled planes and control-line planes allowed; no cars; no free-flight.
5. Only 4 planes in the air at any one time.
6. All transmitters to have Frequency Flags displayed. All flyers must post current 107th Membership cards on Frequency Board before Transmitter is turned on.
7. If anyone causes damage to another's property, including crashes due to frequency conflict, that person is responsible for the damages.
8. Entrance Gate must be locked at all times—MDC Permit rules.
9. No alcoholic beverages permitted at Field.
10. No intentional flying over Route 107 or Pit Areas or control-line area.
11. No taxiing in Pit Areas. Carry running plane to Taxiway or Runway or taxi across the dirt from the setup stand to the runway. The concern is aiming a plane at others, when there is a risk of radio interference.
12. Pilots must loudly announce for all other pilots to hear:

All takeoffs, landings, touch & goes, dead stick landings, persons on runway or field, loss of control, stranded aircraft recovery.
13. No restarts on runway if other pilots are waiting.
14. Leave no litter. Clean up trash you may see. Especially clean up all pieces of crashed aircraft. Use trash Barrels provided. If trash bags are full, take them home and put out for collection.
15. Disturbing any Birds or Wildlife is strictly prohibited.
16. Do not approach full scale planes in a manner which their pilot may see your plane and report sighting to FAA.
17. Guests may fly three days then must join the Club as full members.
18. Any persons observed riding on sport vehicles, motorcycles, or acting in destructive manner should be reported to MDC 617-727-5380 or Environmental Police 617-727-3905. A sample warning to them can be: "If the police catch you here, they will take your bike. Don't get caught."
19. Members should act in a civil and helpful manner, especially trying to assist new flyers.
20. Planes with loud pipes or engines should be aware of sound carrying to houses when wind is from East. Fly low, short flights. No flying before 9AM on Sunday. Please.
21. Be aware that we have probably the last almost perfect flying Field in the area. Your Officers and Members have worked hard to accomplish this. PLEASE take care to see that we do not lose the Field due to thoughtless or careless acts.
22. Planes should be started in the pit area only. Bring your setup table into the pit area or use the ones provided. The pit area is nicer than the dirt by your vehicle.
23. One spot nearest the shed is reserved for handicap parking. Please allow our handicapped members to park there.
